1. The subject proposal has been reviewed by the interested components of this Office from the standpoint of its possible value and usefulness to ORR.

2. The conclusion reached is that ORR could not justify sponsorship of the project within the guidelines of its mission. This is not to say, however, that the reviewers found the project outline illogical or the topic of no value. Rather, it is the opinion of the reviewers that the interest of this Office is at best peripheral.
